### Cell Theory Timeline Foldable

You will create a timeline foldable to organize information about six very influential scientists, "giants," that helped to establish the cell theory as we know it today. These "giants" include Robert Hooke, Anton Van Leewenhoek, Matthias Schleiden, Theodor Schwan, and Rudolph Virchow.

#### Directions for the foldable

The foldable can be created as a billboard with flaps that open on the inside.

1. Fold a piece of 8 ½ x 14 the long way (hot dog style). See diagram 1.
2. Write a title on the outside.
3. Use 6 small pieces of paper, 4 x 3 inches. Fold the small pieces of paper in half the short way (hamburger style). These will be flaps on the inside of the foldable, one for each scientist. Glue the flaps inside the foldable. See diagram 2.
4. On the outside of each flap, write the scientist's name and dates(of scientific contributions to cell theory). A picture would be helpful. On the inside of each flap, write their contribution and how their work was affected by earlier scientists.

Names	_____ / 24
Dates of contributions	_____ / 24
Contributions	_____ / 30
Chronological Order/Neatness	_____ / 10
Folded and Glued Correctly	_____ / 12
<b>Total</b>	<b>_____ / 100</b>
